250mm-950mm  
250mm-650mm

*Panel Heights*  
350mm-3000mm  
350mm-3000mm

# FIXED SHUTTERS USING U CHANNEL

For openings such as room dividers, U Channel can be used to fix the shutters in position when hinging is not required. This method offers a very simple installation, good lightblock and very neat presentation. This method can cover any width required using rabbet stiles on overlaps.

Panels lift and drop into place, with the larger U Channel placed across the top. Side fascias are supplied, and if required these can be glued, taped or pinned in place. Once the side fascias are fitted, the panels cannot lift out without first removing the fascias, so we recommend only installing them if necessary.

U Channel is an Inside Fit option. Please provide tight sizes. Select 'Fixed' in Mounting Method on the Order Form.
